**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. Claims 3 and 6-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In each of claims 3 and 8, "the corrugated material" lacks antecedent basis when containerboard or paperboard is being claimed. Claims 2 and 7 do not necessarily provide antecedence since corrugated material is being claimed alternatively with other materials. Also, since corrugated material is not necessarily being claimed, claims 3 and 8 are not further limiting of the containerboard or paperboard. Claims 3 and 8 should define that corrugated material is actually being claimed and then further define the particular type of corrugated material.

In claim 6, lines 6 and 8, "said side panel tab" is unclear insofar as a plurality of side panel tabs were previously defined in the claim.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zukoski in view of Pidgeon or Eskandry. Zukoski discloses a box including bottom panel 1, two corner panels 41, 45 forming a locking arrangement in the closed container and a bottom flap formed by the perforated section in bottom 1. Zukoski does not disclose an outer surface of the bottom flap

printed with warning indicia and, with respect to claims 5 and 10, warning indicia printed on the outer surface of the first corner panel. Pidgeon teaches that it is known to print the outside of a box with a red color. Eskandry teaches that it is known to provide warning indicia on all sides of a box. It would have been obvious to print the entire outside surface of the box in Zukoski with a red color as taught by Pidgeon to direct attention to the box. It is noted that no distinction is seen between the red coloring suggested by Pidgeon and the indicia claimed as a result of the intended use of the indicia as a warning, i.e. the color red is considered to be useful as a warning as well as serving a decorative function. It would have been obvious to make the box of Zukoski with warning indicia on all sides of a box as taught by Eskandry to facilitate use of the box as both a warning device and to retain contents.

### ***Conclusion***
